Corythornis leucogaster : Mainland RacesAdditions to Local Avifaunas

Ibadan: On the morning of the 18th July, 1967, Dr. R.W. Ashford and I flushed a Pennant-winged Nightjar Cosmetornis vexillarius on the University of Ibadan Campus. The bird was seen on two occasions, in good light, the elongated primaries, although not apparently fully developed, being immediately noticeable. The species is not listed by Elgood and Sibley. (Ibis 106 1964:221-248)

R.H. Parker

Zaria: Vide note on Anas punctata at Zaria : C.H. Fry p.15 of this issue.

REQUEST FOR INFORMATION

Mr. R.H. Parker of the Department of Zoology, the University of Ibadan, would be pleased to receive information on the volume, (and, or measurements of greatest diameter and length from which volume can be ascertained) and the weights of as many Nigerian birds' eggs as possible. Additional information should include: species, locality, clutch size and date. If date of laying is known this too would be of great assistance.
